The Center for
Professional Advancement
Continuing Education
Through Total Involvement

Customized Training at Your Location...

Offered at your location and convenience, The Center for Professional Advancement's Client-Site Division will bring any of its public courses to your team for customized training, or we can work with you to develop a program to address the issues most critical to your company.

We Can Help You...

As an international leader in continuing education and technical training, The Center for Professional Advancement has successfully trained more than a quarter million people worldwide since its founding in 1967. Whether you are new to your field or a seasoned professional, our short courses covering topics from R&D to Quality and Manufacturing in over 18 applied industrial technologies provide the in-depth, practical knowledge that will enable today's technical and industrial workforce to be more effective, productive and competitive.

What Are the Advantages to a Client-Site Course?

- Train up to 35 of your engineers, scientists or technical staff simultaneously.
- Save on costly hotel and travel expenses for employees.
- Benefit from one-to-one access with a teaching staff comprised of the world's top professionals, in the field you require.
- Reduce training and offsite downtime.
- Tailor the program to your company's specific needs or interests.
- Gain the answers and solutions you seek through our unique interactive structure.
- Protect sensitive proprietary issues from inadvertent leakage.

"We had some tough problems to solve...The Center came through with a course specifically tailored to our needs."

*Plant Manager,
International Pharmaceutical Manufacturer*
